TOPCRET

The Experts Choice

WATERPROOF
HIGH RESISTANCE TO CHEMICALS AND UV RAYS

T/SWIM®

TECHNOLOGY

High resistance to chemicals used in water and UV rays.

SUSTAINABLE

Can be quickly and easily applied in both new pools and renovations, thanks to its adhesive qualities.

40 COLORS

Available in a wide color palette, textures, and with the artisanal trowel finishing, T/SWIM® achieves surfaces of great quality and beauty.

T/SWIM® is our system for pools, wet areas, and spas. It is resistant to chemical agents used in water and uv rays

- Our R&D Department has managed to create T/Swim®, a specific coating for swimming pools, which preserves the same advantages of Microcemento®: available in many colors, quick installation and without the need to remove the existing base.
- It is resistant to chemicals used in water and UV rays.
- Colors inspired by nature, which will make your pool a unique piece. At the same time, it allows you to combine colors to form borders or motifs, giving your pool personality.
- T/Swim® does not require work and is applied quickly and easily both in new pools and in renovations.
- Thanks to its excellent adhesive qualities, it can be installed over cement, ants, ceramic, and tile.
- Topcret has created together with T/Swim® the T/Grip® treatment, a finish that increases slip resistance making it ideal for the contour of your pool.

LAB TESTS AND CERTIFICATIONS

T/SWIM® has been thoroughly tested by third party entities under international standards, giving us the authority to support our claims.

In the link you will find the certificates

COLORS COLLECTION

TEST AND TECHNICAL DATA

Resistance to adherence, UNE-EN 13892-6	>1,2 N/MM^2
Surface hardness, UNE-EN 13892-6: 2003	43 N/NMM^2
Slip resistance (unpolished pavements) UNE-ENV12633	27
Wear resistance BCA, UNE-EN 13892 - 4	160 M
Resistance to impact: UNE-EN ISO 6272	>14,7 N/M

Frost/thaw resistance:

Exposure temperature -30°C during 12 hours, followed by immersion in water at 10°C during 12 hours.
No defects were observed after 30 cycles (such as cracking, crazing, loss of colour or material degradation).
